The Director of Central Intelligence

Washington, D.C 20505

25X1

Critical Intelligence Problems Committee

30 August 1983
DDW-26

Weekly Activities and Status Report for DD/ICS--31 August

CIPC Organizational Activities

- The August CIPC meeting was held on 29 August.
 - From all indications this meeting was our best to date.
 - The members expressed many accolades on the quality of the Cruise Missile Report.
 - The committee will now review the report and recommendations and provide written comments in three weeks (19 September).
 - Subsequently, the reports will be updated accordingly and forwarded to the DCI on 23 September for his information and promulgation as appropriate. 25X1
- Some reactions to the 29 August meeting: 25X1
 - GEN Pfautz called and reported that in his opinion we run "a well organized and good meeting."
 - He thought the report was excellent. It "read, flowed and linked with the recommendations; a good job in putting it together." He also noted that the report represented a "lot of hard work."
 - [redacted] also called and was very complimentary.
 - The D/ICS also noted that the DDCI had learned that we had a good and productive meeting. [redacted]
- The September CIPC meeting is scheduled for the 26th; the Narcotics Report is the primary agenda item.
 - See last week's report for the production timelines for the Narcotics Report.
- On 30 August, Commodore Reynolds was briefed on the role and mission of the CIPC. Also reviewed with him some of the projects we have underway.
- This report marks the end of seven months, two weeks and five days since the CIPC was organized under its present charter. During this period, the staff and committee were recruited, organized and implemented. We have held five committee meetings, established two operational working groups, and a third is in the process of being implemented; and this report marks the 26th weekly report we have provided you. Also during this time we have addressed a

TOP SECRET [REDACTED]

25X1

number of substantive issues and activities. Attached is a summary of the more significant projects and activities the staff and committee have addressed since its implementation. I hasten to point out the list is not all inclusive.

[REDACTED]

● Outstanding Action Items:

- Establishment of a MASINT Subcommittee

25X1

- * Now that the DDCI has approved this CIPC recommendation, we will be working with SIGINT Committee staff to ensure its effective implementation.

- TOR for China Study Working Group

- * An MFR was provided to the CIPC principals at the 29 August meeting identifying the working group members.
- * However, some key organizations are still outstanding in identifying their respective members and C/CIPC called this to their attention.
- * Our next step is to identify a Chairman and convene the Working Group. Target date continues to be 9 September.

- BW/CW Future Monitoring Potential

- * Staff visit to Edgewood Arsenal is now scheduled for 8 September. The more we investigate this area the more concerned we are that the BW/CW intelligence problems/gap transcend just the monitoring aspects.

Narcotics Projects and Activities: [REDACTED]

25X1

- The [REDACTED] Collection package on Strategic Narcotics Intelligence went to the A/DCI on 29 August. As you know, the package was coordinated with the DDO and the Acting NIO/Narcotics. The effort was an effective demonstration of good staffing between CIPC and the DCI's [REDACTED] Committee. Timely implementation of the correspondence by the A/DCI will be seen by the CIPC as a singularly positive step regarding the narcotics intelligence effort.

25X1

25X1

Late Note: The A/DCI has signed the [REDACTED] collection package; the respective letters to the various NFIB and non-NFIB organizations working the narcotics problem are in the process of being forwarded.

TOP SECRET [REDACTED]

25X1

25X1

[REDACTED]

- On 25 August, [REDACTED] visited [REDACTED] FBIS Liaison, and members of the FBIS staff to discuss the potential for a stronger "analytical" role for FBIS in the narcotics field. The FBIS representatives stated that the type of analysis being discussed is generally performed by the organization's Analytic Group (AG) but that the AG is responsive almost exclusively to Soviet-related problems. The representatives appeared to work well with members of the DDI Strategic Narcotics Branch but much of this support appears to be personality-driven rather than institutionalized.

25X1

Strategic Cruise Missile; Monitoring and Verification: [REDACTED]

25X1

- [REDACTED] received a call from Charles Duelfer, action officer in RADM Howe's Politico Military Affairs office at State Department, concerning the status of the "interim" monitoring and verification memo of 18 March. Mr. Duelfer was aware of the cruise missile study and of our intent to factor results of that effort into the final monitoring and verification memo. We will keep him informed of the report status and recommend he be placed on the distribution list once the report is signed by the DCI and published. We will also initiate work on a draft of the final monitoring and verification memo.

25X1

25X1

Narcotics WG Subcommittee: [REDACTED]

25X1

- The Narcotics Working Group's subcommittee which will address the use of classified information as evidence in court, among other things, is scheduled to hold its first session Friday at 1000. [REDACTED] chairman of the subcommittee, was unable to get the group together before this due to annual leave and TDY absences. He has, however, met with each of the members individually to garner their views and he will present a draft terms of reference for the discussion Friday.
